WE DON'T JUST
COMMISSION
BUILDINGS.

WE DELIVER
OPERATIONAL
CERTAINTY.

EVERY
MEGAWATT

EVERY
SYSTEM

EVERY
FAILURE MODE

EVERY
TIME

Modern Data Centres aren't judged on how they're built.
They're judged by how they perform when everything is on the line.
When utility power disappears.
When redundancy is challenged.
When milliseconds matter.

Summit Cx exists to ensure that moment has already been engineered.
Not assumed.

THE SUMMIT STANDARD

OUR PHILOSOPHY. OUR PROCESS. OUR PROMISE.

EVERY CRITICAL FAILURE STARTED AS AN ASSUMPTION.
WE DON'T ACCEPT ASSUMPTION.
WE REQUIRE EVIDENCE.

ANTICIPATE

We identify technical risk long before it becomes programme risk.

Design reviews.
Interface management.
Quality assurance.
Construction readiness.
Problems solved before they exist.

VALIDATE

Evidence replaces assumption.

Every asset.
Every sequence.
Every interlock.
Every failure scenario.
Every result independently verified.

PROVE

Commissioning doesn't finish when the test passes.

It finishes when the facility is ready to support uninterrupted operation.
Prove not only that it works, But that it will continue to work.
That's the difference.

**WE DON'T ASK WHETHER SYSTEMS WORK.
WE PROVE THEY WILL CONTINUE TO WORK.**

ASSUMPTION IS THE GREATEST RISK TO ANY CRITICAL PROJECT.
SUMMIT Cx REPLACES ASSUMPTION WITH EVIDENCE.
OPERATIONAL READINESS ISN'T JUST DECLARED. IT'S DEMONSTRATED.

TESTING FAILURE. PROVING RESILIENCE.

We don't test success. **Success is expected.**

Every contractor can demonstrate a system working.
Very few can prove how it behaves when it stops working.

That's where Summit Cx operates.

Every data centre looks reliable while everything is working.
True resilience is revealed when something stops working.

We engineer, witness and validate
the moments that matter most.

Systems will fail.
Power will be lost.
Components will fail.
Controls will transfer.
Redundancy will be called upon.

Every critical facility is designed with one expectation.
That it will continue operating when individual systems don't.

**Summit Cx exists to prove those transitions
happen exactly as designed.**

Before they're ever needed.

LOSS OF

WHEN OUR WORK IS COMPLETE | **YOU INHERIT CONFIDENCE.**

THE FUTURE OF COMMISSIONING IS **PERFORMANCE ASSURANCE.**

WHAT WE DELIVER

- ✓ Mission Critical Performance assurance.
- ✓ Independent Commissioning Authority
- ✓ Commissioning Management
- ✓ QA/QC Leadership
- ✓ Level 1-5 Commissioning
- ✓ Integrated Systems Testing
- ✓ Operational Readiness
- ✓ Digital Commissioning
- ✓ Technical Governance
- ✓ Executive Reporting
- ✓ Risk Management
- ✓ Global Hyperscale Experience

Commissioning has **evolved**, and is ever-**evolving**. Clients no longer need people to witness testing. They need engineering **partners** capable of protecting billion-pound infrastructure.

They need **strategic thinkers**.
Independent technical leaders.

People who understand that every commissioning decision affects programme certainty, operational resilience and long-term performance.

That's why Summit Cx Services exists.

**SUMMIT Cx ENSURES YOUR PROJECT
IS READY FOR THE WORLD.**

OUR PROMISE.
WE LEAVE EVERY FACILITY
EXACTLY AS IT SHOULD BE.

VERIFIED

VALIDATED

OPERATIONALLY
READY

FUTURE
PROOFED

THE WORLD WILL NEVER SEE THE THOUSANDS OF DECISIONS THAT MADE YOUR FACILITY RELIABLE.
THAT'S EXACTLY HOW IT SHOULD BE.
THE DAY YOUR FACILITY GOES LIVE,
SHOULD BE THE LEAST SURPRISING DAY OF THE PROJECT.

EVIDENCE OVER ASSUMPTION | **RESILIENCE** OVER RISK

WHY SUMMIT?

**ENGINEERING CONFIDENCE,
PROVEN AT SCALE.**

Every mission-critical facility is built with one expectation;
That it will perform exactly as designed when failure occurs.

**Summit Cx Services exists to provide independent assurance
that this expectation becomes operational reality.**

Our commissioning professionals combine decades of mission-critical delivery experience across hyperscale, enterprise and co-location data centres, providing clients with independent technical leadership, from design review through to operational handover.

HYPERSCALE EXPERTISE

Extensive experience supporting the successful delivery of large-scale data centre programmes across Europe and international markets.

COMPLETE LIFECYCLE DELIVERY

- Commissioning Management (CxM)
- Independent Commissioning Authority (CxA)
- QA/QC Leadership
- Design Reviews
- Level 1-5 Commissioning
- Integrated Systems Testing (IST)
- Operational Readiness
- Technical Governance

INDEPENDENT ASSURANCE

We work solely in the interests of our clients, providing objective technical oversight, evidence-based verification and structured governance throughout the commissioning lifecycle.

OPERATIONAL CERTAINTY BEGINS LONG BEFORE THE FIRST SYSTEM IS ENERGISED

OUR COMMITMENT

- ✓ **WE DO NOT SIMPLY WITNESS TESTING** WE CHALLENGE ASSUMPTIONS.
- ✓ **WE IDENTIFY TECHNICAL RISK** BEFORE IT BECOMES PROGRAMME RISK.
- ✓ **WE VERIFY** EVERY CRITICAL SYSTEM.
- ✓ **WE VALIDATE** OPERATIONAL RESILIENCE.
- ✓ **WE PROVIDE** THE EVIDENCE THAT GIVES OUR CLIENTS CONFIDENCE.

We will always be guided by our core commitments and core principles:

To protect your programme, your investment and your operational confidence.

Your programme deserves more than successful testing, It deserves **confidence**.

Confidence that **every critical system performs**.

Confidence that **every resilience strategy works**.

Confidence that **your operators are ready**.

Confidence that **your investment enters operation exactly as intended**.

That's our commitment.

WE DON'T MEASURE SUCCESS
BY THE NUMBER OF TESTS COMPLETED.

**WE MEASURE SUCCESS BY THE CONFIDENCE
WITH WHICH YOU ACCEPT YOUR FACILITY.**

THAT'S WHY WE CHALLENGE ASSUMPTIONS.

THAT'S WHY WE DEMAND EVIDENCE.

THAT'S WHY WE TEST FAILURE.

WHEN THE DAY COMES TO
ENERGISE YOUR FACILITY

**THERE IS NOTHING LEFT
TO QUESTION.**

The **confidence** that comes with

200+ GW

Combined mission-critical
power infrastructure delivered
by our commissioning team.
